Education

Norton University Oct. 2024 – Dec 2028

Bachelor of Computer Science

Relevant Coursework

• Data Structures	• Algorithms Analysis	• Artificial Intelligence	• Systems Programming
• Software Methodology	• Database Management	• Internet Technology	• Computer Architecture

SalaIT Feb. 2025 – Apr 2026

Shotcourse Fullstack developer (React + Node,js + PostgreSQL)

Experience

Kru IT Solution 10 Weeks

Backend Development

• Developed a service of Tour trip to make it easier for domestic and international visitors to find tourist destinations and attractions.

• Developed a backend web application for a tour and travel management system using Laravel. The project focuses on implementing server-side logic, managing application data, and supporting travel-related operations.

• Developed backend functionality using PHP and the Laravel framework.

• Worked with database structures and data management.

- Implemented server-side logic to support application features.
- Organized backend code using Laravel's MVC architecture.

INOVATION (Integrated Agricultural Expert System | AI & Software Development) Project Feb – Oct 2026

Full stack developer + AI Engineer

• Developed a rule-based crop disease diagnosis system using symptom matching and diagnostic scoring.

• AI training Data

• Integrated an AI-powered agricultural assistant to provide contextual farming guidance.

• Integrated weather APIs to deliver localized forecasts and agricultural risk alerts.

• Designed a multi-role system for farmers, agricultural experts, and administrators.

• Implemented database management and backend API services using Flask and PostgreSQL.

• Supported English and Khmer interfaces to improve accessibility for local farmers.

• Project Repository**:** https://github.com/CHHORNGL/Project_Assignment

• Hugging Face : Maoseavik (Seavik)

Projects

Telegram Mini App – E-commerce Application | React , Node,js , PostgreSQL , Redis

• Built a mini application designed to operate within the Telegram platform.

• Designed a product browsing interface for online shopping.

• Developed an e-commerce user experience accessible through Telegram.

• Explored Telegram Mini App integration for a convenient in-app shopping experience.

Source Code**:** https://github.com/Seavik2142/mini_app

Social Media Web Application For Engineer | Next,js + Typescript , Node,js , PostgreSQL

• Designed a user-friendly interface for social interactions.

• Worked on application functionality and user experience.

• Developed web application components to support social networking features.

Source Code: https://github.com/Seavik2142/social

Driving License Exam Practice App | Flutter , json file

Developed a mobile application using Flutter to help users practice questions related to the driving license examination.

• Provides practice questions related to the driving license test.
• Helps users prepare for the driving license examination through question-based practice.
Source Code**:** https://github.com/Seavik2142/driving-system

Technical Skills

Languages: Python , javascript , HTML , Css , SQL , NoSQL

Developer Tools: VS Code , Android Studio
Technologies/Frameworks: Linux, GitHub, Hugging Face | (FastAPI , Pytorch) , (React) , (Laravel)

Leadership / Extracurricular

LEADERSHIP & EXTRACURRICULAR ACTIVITIES
Student Team Leader
• Lead a team of four members in academic research, project development, and collaborative problem-solving.
• Coordinate team activities, assign responsibilities, and monitor project progress to achieve shared goals.
• Lead and collaborate with team members in developing projects for academic research and local and international competitions.
• Promote teamwork, communication, critical thinking, and innovation to deliver effective project outcomes.
