PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building AI-enabled applications and backend services. Collected and cleaned agricultural datasets, fine-tuned a Qwen 3B model, and integrated Google Gemini LLMs into ChhlatAI. Seeking an AI Engineering Internship focused on applied machine learning and LLM applications.

TECHNICAL SKILLS

AI / LLM: Qwen 3B (fine-tuning), Google Gemini, Hugging Face, PyTorch

Backend & Data: Python, Flask, FastAPI, Node.js, PostgreSQL, Redis, SQL / NoSQL

Web & Tools: JavaScript, React, Laravel, HTML, CSS, GitHub, Linux, VS Code, Android Studio

EDUCATION

Norton University

Bachelor of Computer Science | Oct 2024–Dec 2028 (Expected)

Relevant Coursework

• Data Structures	• Analysis of Algorithms	• Artificial Intelligence	• Systems Programming
• Software Methodology	• Database Management	• Internet Technology	• Computer Architecture

SalaIT Feb. 2025 – Apr 2026

Short Course: Full-Stack Development (React, Node.js, PostgreSQL)

EXPERIENCE & RELEVANT PROJECTS

Kru IT Solution | Backend Development | 10 weeks

• Developed backend functionality for a tour and travel management system using PHP and Laravel MVC.

• Worked with application data and database structures to support travel-related features.

Source Code: https://github.com/NalenSrin123/tour-trip-back-sat-2-laravel

INOVATION (Integrated Agricultural Expert System | AI & Software Development) Project Feb – Oct 2026

Full-Stack Developer & AI Engineer

• Developed a rule-based crop disease diagnosis system using symptom matching and diagnostic scoring.

• Collected, organized, and cleaned agricultural data for model training.

• Fine-tuned a downloaded Qwen 3B model using the prepared dataset.

• Integrated an AI-powered agricultural assistant to provide contextual farming guidance.

• Integrated weather APIs to deliver localized forecasts and agricultural risk alerts.

• Designed a multi-role system for farmers, agricultural experts, and administrators.

• Implemented database management and backend API services using Flask and PostgreSQL.

• Supported English and Khmer interfaces to improve accessibility for local farmers.

• Project Repository**:** https://github.com/CHHORNGL/Project_Assignment

• Hugging Face: ⊕ Maoseavik (Seavik)

ChhlatAI — LLM APPLICATION | GOOGLE GEMINI

• Integrated Google Gemini large language models (LLMs) into ChhlatAI.

• GitHub: https://github.com/Seavik2142/ChhlatAI

ADDITIONAL PROJECTS

Telegram Mini App – E-commerce Application | React, Node.js, PostgreSQL, Redis

• Built a Telegram mini app with product browsing and an in-app shopping experience.

Source Code**:** https://github.com/Seavik2142/mini_app

Social Media Web Application | Next.js, TypeScript, Node.js, PostgreSQL

• Developed web application components and functionality for social interactions.

Source Code: https://github.com/Seavik2142/social

Driving License Exam Practice App | Flutter, JSON

• Developed a Flutter app to help users practice driving-license exam questions.

Source Code**:** https://github.com/Seavik2142/driving-system

LEADERSHIP & EXTRACURRICULAR

Student Team Leader

• Lead a four-member team in academic research, project development, and collaborative problem-solving.

• Coordinate responsibilities and monitor progress on academic projects and local and international competitions.
